Dear Parent/Carer

YEAR 11: GCSE MATHEMATICS REVISION

For your son/daughter to achieve the best possible grade in GCSE Mathematics, we hope you will encourage him/her to start revising now in readiness for the mock exams in December. Mathematics revision is much more effective if it is done little and often, over a longer period.

To support our students' learning and progress in Mathematics, we would like them to purchase the **Mathematics Bootcamp**. This book makes it easy to schedule revision by breaking down subject content into 30 key areas which can each be covered in 20 minutes.

To ensure students have all the subject knowledge they need to succeed and use the Bootcamp successfully, they should already have the Revision Guide and Revision Workbook which cover the content of the GCSE course. Therefore, **if you have not previously purchased them**, you should order them now. There is also the option to purchase the Practice Papers and 10-Minute Tests which complement the revision guide and workbook. These books come in Foundation or Higher Tier versions. Students should speak to their Mathematics teacher if they are not sure what tier they will be entered for.

In addition, for students aiming for grades 7-9, a Revision & Practice book is available, and for students aiming for grades 3, 5, 7 or 9, there are Target Grade Workbooks.

The MathsWatch disc is another useful resource and includes video clips and worksheets, which students can use at home to revise each topic. The discs are playable on any Windows® PC.

All students will need a scientific calculator and geometry set for their GCSE Mathematics exam.

You will find full details of the books and equipment we recommend overleaf. To order these resources through school, please pay for them through the [School Shop](#) (you will also find a link to the School Shop in the 'Parents' tab on the homepage of the school's [website](#)). Please note that these resources are **not available through your ParentPay account**.

The deadline for orders is **Wednesday 2 October** and the books **will be distributed to students in class** by their Mathematics teacher as soon as possible after this date.

In addition to the above resources, students have access to revision websites such as:

- www.corbettmaths.com – numerous videos, worksheets and practice papers
- www.mymaths.co.uk
- www.bbc.co.uk/schools/bitesize

Yours sincerely

M Hughes

Subject Leader for Mathematics
